

First, you should see a box. Input a valid Twitter user into that box, then click submit

The screenshot shows a web application with a dark red background. At the top center is the logo "RecommendTrit" in a stylized red font. Below the logo, the text "Enter your twitter handle to see your tweets and your automated reader level!" is displayed in white. Underneath this text, there is a label "Enter Twitter Handle:" followed by a text input field containing "BarackObama" and a "Submit" button.

After a few seconds, you should have an asynchronous Message pop up on the web page with the Automated readability index of the inputted twitter handle

This screenshot shows the same web application interface as the previous one, but with an additional line of text at the bottom: "YOUR AUTOMATED READABILITY INDEX IS 10.8885428743". The input field still contains "BarackObama" and the "Submit" button is visible.
